To: Mr. Paul Yeung, Review Engineer, AM/7 Wisconsin Department of Natural Resources P.O. Box 7921, Madison, WI 53707 Mayor Cieslewicz; County Executive Falk Attorney Gen. Lautenschlager; Gov. Doyle	Petition from Neighborhood Residents Draft Permit #03-POY-328 Madison-Kipp Corporation February 23, 2004

Madison-Kipp Corporation operates an aluminum foundry and die casting operations in our neighborhood. The DNR has proposed to issue Permit #03-POY-328, increasing the air pollution emissions from the foundry's two melting furnaces. We welcome the benefits of a nearby employer, but are opposed to additional uncontrolled discharges into our neighborhood. There is ample evidence to show current emissions and odors have already caused nearby residents to suffer adverse health effects. Rather than maximizing emissions, we challenge you to work with Kipp to create a showcase of co-location of industry in a urban, residential neighborhood.
