TIRED OF AIRPLANE NOISE?

Does the increase in number of flights taking off and landing over

our houses bother you? Are you being interrupted while on the phone, having conversations, or watching tv? Are you being woken up early or kept up late by low flying planes?

The main airport noise control plan is to have takeoffs to and landings from the north when weather and traffic conditions permit, so the planes don't fly right over our houses at low altitude.

The success of the airport's noise control plan is judged by how many citizen complaints are received at their hotline. If the noise bothers you, call the airport noise hotline to register your complaint.

AIRPORT NOISE HOTLINE - 246-5841

Our calls are how the airport measures their compliance with noise abatement programs. If we don't call, then they don't know there's a problem. You can call more than once if the problems persist.

Learn how you can make a difference. Your SASY Neighborhood Assocation is working to improve the airport's noise control program. Visit their website at:

www.sasyna.org/airport.html

Or come to meetings the 4th Tuesday of each month. Contact steve for further info on noise-related meetings: steve@sasyna.org
